

I am writing to express my opposition to state energy codes,

- 21-GP1-136
- 21-GP1-103

I am concerned by the SBCC's direction. Total electrification will remove from the region's diverse energy portfolio and will increase the risk of blackouts and price hikes to ratepayers such as myself.

It is for these reasons that I urge a no vote on these two proposals.

---

I am writing to express my opposition to the following proposed code changes for the state energy code:

- 21-GP1-136
- 21-GP1-103

As a business that relies on the use of natural gas, I am concerned these proposals will raise the cost of operating in Washington, while impacting my ability to make energy decisions that best suit my and my customer's needs.

I urge a no vote on these two proposals.
